

INTELLICORE™

Powering Every Evoltix™ System

IntelliCore is the intelligent power management, analytics, and monitoring system behind every Evoltix solution.

A Unified Platform for Intelligent Power

IntelliCore replaces multiple disconnected controllers with a single, smart operating layer that manages the entire power system.

It coordinates:

- ✓ Grid, generator, solar, and auxiliary inputs
- ✓ Battery-first power routing
- ✓ Inverters, rectifiers, and distribution hardware
- ✓ Environmental systems in cabinets and shelters
- ✓ Thresholds, alarms, and operational settings
- ✓ Built-in logic, predictive control, remote monitoring

Built on a Proven Industrial Platform

Every IntelliCore system is powered by the System Control Module, an industrial-grade platform engineered for demanding environments.

- ✓ A rugged 2U chassis
- ✓ Industrial PC Motherboard
- ✓ Solid state charge
- ✓ Relay and dry-contact interfaces
- ✓ CAN bus communications
- ✓ Ethernet and USB connectivity
- ✓ Dual-fan thermal management

IntelliCore keeps the system balanced, efficient, and resilient even when conditions change.

INTELLICORE COMMAND

Onsite Control and Real-Time Visibility

IntelliCore Command is the local interface that runs directly on the System Control Module. It provides immediate clarity at the site level with live power flow, detailed status, and hands-on control.

Capabilities include:

- ✓ Real-time system visualization
- ✓ Power source and battery monitoring
- ✓ Generator, solar, and charging controls
- ✓ Environmental controls for shelters and cabinets
- ✓ Local alarms, service tools, and configuration settings

IntelliCore Command gives technicians the information they need to make confident decisions in the field.

myIntelliCore

Remote Monitoring and System Analytics

myIntelliCore is the browser-based dashboard that provides full visibility from anywhere. With intuitive charts, alerts, reports, and data tools, operators can manage sites without ever stepping onsite.

Features include:

- ✓ Customizable dashboards
- ✓ Real-time notifications and email alerts
- ✓ Battery, generator, and solar performance graphs
- ✓ Power quality and load analytics
- ✓ Multi-parameter trending across long time ranges
- ✓ Automated weekly and monthly reporting

myIntelliCore brings clarity to complex systems and reduces costly site visits.

Intelligence that scales across your network.
When power cannot fail, IntelliCore delivers the confidence operators need to stay connected.
