

Intelligent Power Systems Built for Zero Interruption

ZERO-GLITCH POWER MODULE (ZPM)[™]

Next-generation Backup Power

Traditional UPS systems were built for a different era. Powered by IntelliCore, the ZPM redefines reliability with real-time monitoring, automated alerts, and predictive analytics, ensuring uninterrupted power with total visibility and control.

VAULT POWER SUITE

Off-grid Power for Critical Sites

The Vault Power Suite integrates the ZPM and IntelliCore into durable, turnkey enclosures engineered to deliver uninterrupted power wherever critical systems operate.

Evoltix systems are purpose-built to provide intelligent, dependable power that keeps critical communications online.

INTELLICORE[™]

The Intelligence Behind Every Solution

Every Evoltix system is built on IntelliCore, a unified power management platform integrating monitoring, control, automation, and analytics for full visibility across mission-critical sites.
